UNIVERSITÀ DI TRENTO

Department of Information Engineering and Computer Science

Bachelor's Degree in
Information and Communications Engineering

FINAL DISSERTATION

THESIS TITLE

Supervisors

Fabrizio Granelli

Daniele Miorandi

Student

Samuel Bortolin

Academic year 2019/2020

Acknowledgments

. . . thanks to my family, my girlfriend, my supervisors and all the U-Hopper team . . .

Contents

Abstract

Sentence that describes the problem ...

The abstract is a short summary of the work describing the target, the subject of the thesis, the methodology and the techniques, the data collection and elaboration, the explanation of the reached results and the conclusion. The abstract of the dissertation must have a maximum length of 3 pages and must include the following information:

- context and motivation

- short summary of the main problem you have dealt with

- developed and /or used techniques

- reached results, the personal contribution of the student has to be highlighted

1 Introduction

Brief introduction to the work @ U-Hopper.[1]

1.1 Problem statement

This is the problem . . .

1.2 Approach to the problem

This is the approach . . .

1.3 Outline

Here it is written how the thesis is organized . . .

---

[1]website u-hopper.com

2 State of the Art

Literature review . . .

2.1 People counting methods

What are the methods for count the people . . .

2.2 Wi-Fi probe request frames methods

Wi-Fi spproach . . .

2.2.1 People estimation on public transports

Here there are two interesting articles [3] [2].
Something else [1] . . .

3 System Design

Write about the methodology and the choices in the system design . . .

3.1 System architecture

Describe the system architecture . . .

3.2 Data collection

How I collected the data . . .

3.3 Data transfer

How I used the MQTT protocol to forward the data . . .

3.4 Data analysis

How I analyzed the data . . .

4   Implementation

Write about the implementation . . .

4.1   Sniffer implementation

Write how the sniffer has been implemented on the Raspberry Pi . . .

4.2   Implementation of the Back-End

Write how the Back-End for analysis has been implemented . . .

5 Evaluation

Write about the evaluation case study ...

5.1 Experimental validation

Write about the experiments ...

5.2 Evaluation of the results

Write the evaluation ...

6 Conclusions

Write conclusions about the work done . . .

6.1 Future work

Write about future work . . .
